

*For overgrown Cornish churchyards,
heavy growth or annual hay cut...*

...God's Acre Trimmer

Cornwall's Living Churchyard Scheme
has acquired a specially designed
machine to assist individual church
projects with that most difficult task
- clearance of heavy growth
or annual hay cut.

This professional quality cutter has been developed specifically for churchyard work, enabling it to cut close to memorials and to be fully manoeuvrable in awkward areas. If your church or project needs help with a problem area, or would like help with your annual cut, telephone Robert Moor on (01872) 272929. For a trial period the machine is free of charge. In future there may be a small charge towards transport, fuel etc.

Cornwall's Living Churchyards Project
is a joint initiative between the Cornwall
Wildlife Trust and the Diocese of Truro.

Help is available from the Cornwall Living Churchyards Project

The Living Churchyards Project was established in 1993. The project aims to work with church groups and local people to encourage wildlife friendly management of Cornwall's churchyards. The Cornwall Wildlife Trust and the Living Churchyards Volunteer Coordinator can provide help with:

- Carrying out churchyard wildlife surveys
- Preparation of churchyard wildlife management plans/maps
- securing grant funding for churchyard wildlife projects
- Carrying out churchyard risk assessments and memorial safety testing
- Involving the local community
- Networking with other living churchyards groups in Cornwall

Where to find help:
