

WE MUST LOOK AFTER THE WORLD

THE WORLD'S NATURAL CYCLES, LIKE THE CARBON CYCLE, NEED TO STAY IN BALANCE TO KEEP US - AND THE WILDLIFE AROUND US - ALIVE AND WELL. HERE'S HOW YOU CAN HELP:

Save energy

SAVE ELECTRICITY!

We can switch off lights, heating, TVs and computers when we are not using them.

TURN IT OFF!

SAVE PETROL!

We can walk or cycle for short journeys if it is safe to do so. Sharing transport saves fuel.

RECYCLE!

We can recycle bottles, cans, paper, card, clothes and even some plastics.

TURN RUBBISH INTO RICHES!

Some ideas:

1

Plant seeds in an old cardboard egg box. Later, you can plant the whole thing in the garden!

Decorate cartons, tubs and trays from the shops and use them to hold paints and pens. (Paint on the back of used paper and card!)

2

3

Cut doors and windows in empty boxes to make a toy house, castle or stable.
