# Butterfly Walk

## You Will Need:

My Butterfly Key Printable PDF

Coloured pens / Pencils

Clipboard

Printed images of: Red Admiral, Painted Lady, Large White, Orange Tip, Clouded Yellow and Marsh Fritillary Butterflies.

## Activity Plan:

1. Spread out the images of the butterflies along a path or route prior to the session starting.

*To make this reusable and/shorter you could laminate the photos and have smaller printed photos that participants could stick/velcro to their ID keys.*

2. As you walk the route ask participants to look for butterflies.

3. When they see the butterfly picture answer the questions on the key to identify it.

4. Once you have identified the butterfly, copy the picture into the key so that you can use it to identify butterflies in the future. Think of key aspects it will be important to copy across.

5. Collect all the photos in at the end - ready to be used next time.
